

# WP20®

WP20® is a colourless, uniquely stabilised formulation containing peroxyacetic acid, hydrogen peroxide and acetic acid.

WP20® works by the generation of free oxygen that ruptures target microbial cells and denatures their proteins. This effective mode of action does not give rise to resistance in the targeted microbes.

## Key features

- Fast acting
- Completely bio-degradable
- Independently tested
- Defra approved
- Non tainting
- Effective against disease-causing viruses, bacteria & fungi
- Organic farm-friendly
- Food safe
- Ideal cluster wash
- Suitable in cold conditions and in hard and soft waters

### Livestock

WP20® is an effective disinfectant suited to rotational cleaning programmes with other disinfectants used in the poultry, pig, dairy and cattle industries.

### Aquaculture

WP20® is the ideal product for disinfecting surfaces, equipment, nets, footbaths, well boats and fogging.

### Horticulture

WP20® is suitable for the routine disinfection of glass houses/tunnels, pots, trays, foot dips, equipment and spray lines.

### Instructions for use

Apply WP20® through a power washer at low pressure or knapsack sprayer

Application	Dilution
Routine disinfection of dry pre-cleaned surfaces	1:250
Equipment-dipping	1:125
Foot/wheel dips	1:125
Thermal fogging for empty buildings	1:13
Spray lines	1:125
Water treatment	1:1000-2000
Cluster washing	1:200

### Presentation

5L, 20L, 200L, 1000L

**Shelf Life:** One year from manufacture

### Precautions

Store in original container with lid/cap in place.  
Keep out of direct sunlight.  
Refer to manufacturer's label and Material Safety Data Sheet before use.  
Keep away from children.
