

WILLIAM PEARSON

# VIRUCIDAL WP™

Virucidal WP™ is a powerful broad spectrum disinfectant effective against virus, gram positive and gram negative bacteria, fungi and moulds. Based on a stabilised blend of peroxygen compounds with surfactant, organic acid and a buffer.

Virucidal WP™ is a versatile disinfectant for use on all surfaced, equipment and water systems, aerial fogging and foot and wheel baths.

## Key Features

- Powder disinfectant easily dissolved in water
- Fast acting
- Pink powder for easy identification on dilution
- Excellent stability and efficacy against viral, bacterial and fungal pathogens
- Effective in hot and cold conditions
- Effective in hard and soft water
- Biodegradable and degrades into harmless components.
- Defra approved
- Effective against African Swine Fever at 1:800
- Non-corrosive in dilution

## Usage recommendations

On surfaces and equipment after initial cleaning spray at low pressure

Use	Dilution
For emergency disease application	1:250 or 1:100
Foot baths and vehicle dips	1:100
Aerial misting	1:200
Thermal Fogging	1:25
Continual use in drinking water system	1:1000
Cleaning drinker systems out after depletion of livestock	1:100

### Pack sizes

5kg, 10kg

### Storage

Store in original container in dry cool conditions with lid firmly closed

### Shelf Life

Three years from date of manufacture

### Biodegradable

Virucidal WP™ is fully biodegradable according to the OECD and EU test method. All ingredients in Virucidal WP™ are REACH registered and comply with European regulations and contain no material classified as PBT (Persistent Bioaccumulative and Toxic) or vPvB (very Persistent, very Bioaccumulative)

### Precautions

For professional use only: use biocides safely.

Always read manufactures label and material safety data sheet before use

Always wear appropriate PPE

Keep away from children
